

The No Call List needs to be left as it is. Before this list I was always being contacted by telemarketers at all times during the day and night. I've had them contact me as late as 11 pm when I would be sleeping (which is absolutely ridiculous). It is also very disruptive when they are calling during lunch/dinner or when I had call forwarding to my cell phone. I don't need them calling me on my cell phone at all hours either. I believe this No Call List has been a wonderful thing and should be left alone the way it is. Thank you.
